

PRESS RELEASE

Absolent announces launch of digital solution for tracking clean air

Lidköping, Sweden - May 3, 2022 - Absolent AB releases a new product within the A•smart family: A•smart Ambient, for tracking indoor air quality for a safe and clean environment. With rising awareness and knowledge of the effects that air born pollution can have on our health, Absolent would like to assist and bring some light to the indoor air quality problems and the importance of clean and safe air also in our work environments.

"It is our mission to make the air that you and your colleagues breathe as clean and safe as we possibly can. With the new addition in the industrial IoT portfolio you can track your air quality and minimize the risk of exposure to air borne contaminants. The continuation of the IoT journey, in our air cleaning equipment offering, is just another step to manifest our commitment to provide clean and safe air. Just like we can offer the best solution on the market when it comes to air filtration, it is exciting to also bring real time knowledge about air quality to the table.", says **Mattias Cleveson, CEO Absolent AB.**

How the A•smart Ambient works

The A•smart Ambient monitor the air quality with sensors specifically selected for indoor air quality monitoring. The air quality data is collected and sent to the Absolent secure cloud where it can be viewed on a laptop or a mobile device via the A•smart Dashboard. A•smart Ambient monitors Particulate Matter (PM₁₀, PM_{2,5} and PM₁), Volatile Organic Compound (VOC), Carbon dioxide (CO₂), Relative Humidity and Temperature in real time. A•smart Ambient connects to A•smart Sense or A•smart Connect. A•smart system operates independently from a customer's existing IT-infrastructure or WIFI network and no integration is required thanks to its smart communication via radio/GSM. The A•smart system will bring out the most of all Absolent filter units and the A•smart Ambient will help keeping track on clean and safe air for workshops all over the world.

Part of Absolent
Air Care Group

Launch

The A•smart Ambient will be available for the European market from May 3, 2022.

Want to find out more on how A•smart system and the rest of the Absolent products could help improve the air quality in your workshop? Contact Absolent or visit our website www.absolent.co.uk
